PROFESSIONAL EXPERIENCE:

Stace is a founding member of **Green Insight**. As the managing member he is responsible for business operations, contract administration, Green Rater overview and coordination. Stace is also the founding partner of Environmental Dynamics Inc (**ēdi**). In **ēdi**, Stace has helped to create a firm that provides the highest quality architecture and professional service by integrating client objectives and progressive environmental ideals. Sustainable design has been the foundation of **ēdi**'s work from its inception. A recognized leader in ecologically appropriate architecture, **ēdi** works collaboratively in pursuit of design that is not just sustainable, but regenerative.

Stace's current passion is to align the USGBC and NAHB together to transform the residential market place for a more sustainable future. In 2008 and 2009 he was a consultant to the LEED for Homes Department of the USGBC, helping to train LEED for Homes Advocates from each chapter to work with their local Home Builders Associations and helping to create local Residential Green Building Committees to support growth in green home building.

Stace is a dedicated ambassador for the green building movement and advocate for future generations who depend on sustainable development today.
